Easyset — Programming Software

VECTOR — Controls and Sensors

nex — data management systems — Big Data Cloud Service

EasySet, technician software that makes your Vector TCX2 control system easy to configure and commission. Simple to design, save, share, and commission your applications.

- Live data trends with CSV export
- Template programs included
- Preset sensor options
- Save custom applications
- Sensor calibration feature
- Free download with updates

Free download:

Vector Controls, a diverse range of controls and peripherals, Swiss quality with local support. Combine with WMS1 web management system for a reliable and flexible BMS solution.

- Extensive controller range
- Quality sensor options
- Standalone and networked options
- BACnet and Modbus communications
- Swiss engineering
- Local support available

insight control

ABOUT INSIGHT

Insight Control are proud to offer a range of control systems and solutions that allow simple and reliable options to **"configure, control, connect"** your building or business.

We are dedicated to developing and selecting the best control and monitoring products that complement each other and provide superior options for many applications big or small, simple and complex.

With in-house electrical engineering services available, we offer a hands on approach to the control industry and understand that support should extend way beyond getting a box out the door. We will work with you and your team and help deliver a quality result on time and on budget.

We can offer a standalone controller, through to a complete pre-engineered and installed BMS and Monitoring system, taking the complexity and guess work out of BMS and HVAC control systems.

We may not be the biggest but we aim to be the best. Contact us and ask how we can help with your next control project.
